TEAM DELIVERY PLAN

UIMS Trello Task Breakdown

University Internship Management System

68	7	31
ACTIONABLE CARDS	TEAM MEMBERS	CORE PAGES

Complete page ownership: Front-end / C# Web Forms / Firebase / Testing

Includes optional Zoom Meetings module and six project-wide tasks

ISSUED 20 OCTOBER 2026

PROJECT DEADLINE 24 OCTOBER 2026, 11:59 PM

01 Assignment at a Glance

All 31 counted core pages have a single named developer. About Us is included with Home but not counted separately.

MEMBER	OWNERSHIP	PAGE SCOPE	CARDS
Ahmed	Authentication, Academic Accounts & Final Completion	7 core pages	16
Osama	Applications & Coordinator Monitoring	5 core pages	8
Nada	Company Management, Trainees & Company Evaluation	6 core pages (includes Home)	10
Fatima	Tasks, Submissions & Optional Zoom Meetings	2 core pages + Zoom module	10
Sara Rajoub	Internship Opportunities & Student Features	4 core pages	7
Suja	Academic Supervisor Monitoring & Evaluation	4 core pages	7
Sara Dolat	Contact & Coordinator Profile	3 core pages	4

Scope: 62 development cards + 6 project-wide cards = **68 cards**. Zoom Meeting cards F08-F10 are optional. Home and About Us belong to Nada. My Progress & Evaluation belongs to **Ahmed** (not Suja).

02 How to Use These Cards

One Trello card = one verifiable deliverable; all work on an assigned page stays with its owner.

Create cards by ID - Use the exact card titles and IDs (for example, F04 - Implement Task Submission Form). Assign the owner shown in each section.

Paste the implementation details - Copy the Build text into the card Description and the Done when text into a checklist or acceptance-criteria field.

Track a simple workflow - Recommended lists: To Do / In Progress / Testing / Done. Move cards to Done only after the acceptance criteria pass.

Integrate through shared data - Members may read records created by others, but each page's own Front-end, C# code-behind, Firebase operations, and tests remain with the assigned owner.

Critical ownership distinction
The **University Internship Coordinator** creates Company Supervisor accounts using Manage Companies. **Nada** is the developer assigned to build that Coordinator page; Company Supervisors do not create their own accounts.

01 Ahmed

Authentication, Academic Accounts & Final Completion | 7 core pages | 16 Trello cards

Confirmed change: Ahmed owns My Progress & Evaluation, including the approved-hours display and PDF download.

AUTHENTICATION & LOGIN

A01 Build Login Page UI

Build Develop the responsive login page with email/password inputs, a show/hide password control, field validation, and clear error messages using Web Forms and Bootstrap 5.

Done when The form validates input and displays understandable feedback on desktop and mobile.

A02 Implement Firebase Authentication & Role-Based Access

Build Connect login to Firebase Authentication; load the user role (Student, Company Supervisor, Academic Supervisor, or Coordinator); redirect to the appropriate dashboard; implement logout and back-end authorization checks.

Done when A user can log in and out and cannot open another role's protected pages, including by typing a URL directly.

A03 Implement Password Recovery

Build Support password recovery through Firebase Authentication, including requesting a password-reset email and displaying safe success and error messages.

Done when A user can request and complete the reset process.

A04 Implement First Login Password Change

Build Identify students using initial temporary passwords and require them to change the password before continuing into the system.

Done when A student cannot bypass the first-login password change.

COORDINATOR | STUDENT & ACADEMIC ACCOUNTS

A05 Create Student Accounts

Build Build the Manage Students form to create student records with name, email, university, college, major, required internship hours, and temporary login credentials. Provision the authentication account and corresponding Firebase profile.

Done when The Coordinator creates a student who can then log in with an initial password.

A06

View & Update Student Information

Build Build a student list, search, and edit/details view. Allow the Coordinator to update academic fields and other administrator-managed information, with Firebase persistence.

Done when Updated student details persist and administrative edits are restricted to the Coordinator.

A07

Manage Academic Supervisor Accounts

Build Build the Coordinator interface to create academic supervisor accounts, view and manage their information, and assign the correct role through the common authentication mechanism.

Done when An academic supervisor account created by the Coordinator can log in with the correct role.

A08

Create Student Groups & Assign Supervisors

Build Create a group-management interface, organize students into groups, assign one academic supervisor to each configured group, and store all relationships in Firebase.

Done when Every configured student group has its assigned supervisor, and that supervisor can see its students.

A09

Modify Academic Supervisor Assignments

Build Allow the Coordinator to edit student-group membership and change a group's assigned academic supervisor; update linked records and access accordingly.

Done when New assignments are reflected in the relevant academic supervisor views.

COORDINATOR | FINAL INTERNSHIP COMPLETION

A10

Build Final Completion Review Page

Build Display each student's company final evaluation, academic final evaluation, approved training hours, internship details, and completion requirements for Coordinator review.

Done when The Coordinator can inspect all information required before approving completion.

A11

Implement Final Grade Calculation

Build Calculate the final result from the assigned university's documented evaluation components, scales, and weights; avoid assuming all activities are scored out of 100.

Done when The result matches documented sample calculations using the chosen university rules.

A12

Implement Internship Completion Approval

Build Allow the Coordinator to approve internship completion only after validating the required evaluations, approved hours, and defined university conditions; persist approval status and metadata.

Done when No student becomes officially completed without Coordinator approval and satisfied conditions.

A13

Generate Official Internship Completion Report (PDF)

Build Produce the official Internship Completion Report with student, internship, approved outcome, and final-result information. Save the report reference for authorized student access.

Done when An approved student has a correct, downloadable PDF completion report.

A14

Generate Internship Completion Certificate

Build Enable the Coordinator to generate and print an official Internship Completion Certificate after completion approval.

Done when A certificate can be generated and printed for an approved student.

STUDENT | MY PROGRESS & EVALUATION

A15

Display Student Progress, Task Feedback & Hours

Build Build My Progress & Evaluation to display the student's task grades, supervisor feedback, submission and revision history, approved training hours, and overall internship progress.

Done when The student can see only their permitted progress and task evaluation data, not confidential supervisor final evaluation forms.

A16

Display Final Result & Enable PDF Download

Build Show the student-visible final result and enable download/printing of the official Internship Completion Report only after Coordinator approval.

Done when The report is unavailable before approval and accessible only to its rightful student afterward.

02 Osama

Applications & Coordinator Monitoring | 5 core pages | 8 Trello cards

STUDENT | INTERNSHIP APPLICATIONS

O01 Build Internship Application Form

Build Create the Application Form for a selected opportunity, retrieve its details, validate the submission, and create a student-linked application in Firebase with Pending status.

Done when A new application appears in the student's My Applications and the company's Applications Review.

O02 Display Student Applications & Statuses

Build Build My Applications, showing the student's application list, opportunity/company details, and Pending, Accepted, or Rejected states, including rejection reasons where relevant.

Done when The student can correctly view all of their applications and current statuses.

O03 Implement Single Offer Confirmation

Build Let a student confirm an accepted internship offer; enforce in the back end that the student cannot confirm more than one internship placement.

Done when A first valid confirmation works and any second concurrent or repeated confirmation is blocked.

COMPANY SUPERVISOR | APPLICATION DECISIONS

O04 Display Applicants to Company Supervisors

Build Build Applications Review to show student applications linked to internship opportunities owned by the supervisor's company, including student and application details.

Done when The supervisor can see only applications for their company.

O05 Accept & Reject Internship Applications

Build Implement acceptance and rejection actions, require a reason for rejection, and save decisions in Firebase so students see updated statuses.

Done when Decisions and rejection reasons persist and appear correctly in My Applications.

COORDINATOR | DASHBOARD & MONITORING

O06

Build Coordinator Dashboard Statistics

Build Create the Coordinator Dashboard with database-driven counts and summaries of students, companies, opportunities, internships, and evaluations.

Done when Statistics are populated from Firebase records rather than hard-coded sample values.

O07

Build Internship Placements Monitoring Table

Build Display students and their confirmed placements, associated companies, and internship statuses. Support finding a student and opening a placement details view.

Done when The Coordinator can locate and inspect any confirmed student placement.

O08

Display Detailed Student Internship Progress

Build Show tasks, submissions, evaluations, approved hours, companies, and progress for a selected student in the Coordinator monitoring view.

Done when The Coordinator sees appropriately linked, up-to-date internship data.

03 Nada

Company Management, Trainees & Company Evaluation | 6 core pages (includes Home) | 10 Trello cards

Access reminder: Manage Companies is used by the Coordinator, although Nada develops the page.

PUBLIC | HOME & ABOUT US

N01 Build Home Page & University Information

Build Build a responsive university-branded Home page showing the university identity, system introduction, colleges, specializations, internship steps, and a dedicated internship-process video section.

Done when The page uses the selected university's identity and includes all required information and video content.

N02 Display Opportunity Previews & Build About Us

Build Retrieve abbreviated internship opportunity previews from Firebase for the Home page; require login for full details and applications. Create About Us with the university, system, and objectives.

Done when Visitors can preview opportunities but cannot open full details/apply without login; About Us is available.

COORDINATOR | MANAGE COMPANIES

N03 Create Company Supervisor Accounts

Build Build the Coordinator-only Manage Companies form to create Company Supervisor accounts, capture supervisor and associated company information, and provision Firebase credentials using Ahmed's shared authentication architecture.

Done when The Coordinator can create a company supervisor who can log in with the Company Supervisor role.

N04 Manage & Activate/Deactivate Company Supervisors

Build Create a listing of company supervisor accounts with permitted profile edits and enable/disable actions; enforce the activation status when protected company pages are used.

Done when A deactivated supervisor cannot use protected company functions until reactivated.

COMPANY SUPERVISOR | DASHBOARD & TRAINEES

N05 Build Company Dashboard

Build Show counts and summaries for the supervisor's company: opportunities, applications, students, tasks, submissions, and evaluations.

Done when Statistics are accurate and scoped to the supervisor's own company.

N06

Display Accepted Trainees

Build Build My Trainees showing students with confirmed placements at the company, together with trainee information, opportunity, and internship status.

Done when Confirmed students appear under the correct company and are not exposed to other companies.

N07

Build Trainee Details & Progress View

Build Let a company supervisor open an accepted trainee to view training information, tasks, evaluations, approved hours, and progress.

Done when The supervisor can monitor company trainees using the available Firebase records.

COMPANY SUPERVISOR | FINAL EVALUATION & ACCOUNT

N08

Build Reports & Final Company Evaluation Form

Build Provide report evaluation where required and a final company evaluation form using the selected university's assessment criteria, scores, and any relevant weights.

Done when The company supervisor can enter, validate, and save a student-specific final evaluation.

N09

Send Company Final Evaluation to Academic Supervisor

Build Submit the completed company final evaluation to the student's assigned academic supervisor; link the record to the correct placement and make it available to Coordinator review.

Done when The academic supervisor receives the company evaluation, while its confidential form is not exposed to the student.

N10

Build Company Supervisor Account Page

Build Show company supervisor account information and permit updates to allowed fields only; save changes in Firebase.

Done when The supervisor can update permitted profile fields but cannot self-change role or company association.

04 Fatima

Tasks, Submissions & Optional Zoom Meetings | 2 core pages + Zoom module | 10 Trello cards

Scope note: F08-F10 cover Zoom scheduling and stored join links. Automatic Zoom API meeting creation is not included.

COMPANY SUPERVISOR | TASK CREATION

F01 Create Internship Tasks

Build Build a task form for supervisors with title, description, instructions, deadline, trainee, and evaluation criteria; associate each task with the correct internship.

Done when A supervisor creates a task and it appears for the assigned student.

F02 Display & Manage Created Tasks

Build Create a company task-management list showing tasks, assigned trainees, deadlines, submission statuses, and task details with the relevant management actions.

Done when A supervisor can manage tasks for their own trainees, not those of another company.

STUDENT | TASK SUBMISSIONS

F03 Display Assigned Student Tasks

Build Build My Tasks showing the student's assigned task details, requirements, deadlines, and statuses, with access to submission actions when appropriate.

Done when A student can view only their own assigned tasks.

F04 Implement Task Submission Form

Build Enable students to submit completed work as text descriptions, links, or files when required; store submission records and associated file references securely.

Done when The appropriate supervisor receives the student's submission and the status updates correctly.

TASK REVIEWS, REVISIONS & AUDIT HISTORY

F05 Review & Evaluate Student Submissions

Build Build the supervisor review view: inspect submitted work, evaluate it using the university's specified criteria, add feedback, and store results.

Done when Task evaluations and permitted feedback are saved and become visible to the student.

F06

Request Revisions & Enable Resubmission

Build Allow a supervisor to request changes with clear instructions; show the request to the student and accept a new version of the work without replacing earlier versions.

Done when Submission -> revision requested -> resubmission -> review works end to end.

F07

Maintain Submission & Feedback History

Build Store submission attempts, timestamps, evaluation entries, feedback, and relevant task-state changes as a retrievable history.

Done when Earlier submissions and feedback remain accessible after later resubmissions.

OPTIONAL | ZOOM MEETINGS

F08

Build Zoom Meeting Scheduling Form

Build Provide meeting scheduling for relevant students, company supervisors, and academic supervisors: date/time, participants, and Zoom joining link; save meeting records in Firebase.

Done when A scheduled meeting is saved and linked to its intended participants.

F09

Display Scheduled Meetings & Join Links

Build Build meeting views for students and both types of supervisors, listing their scheduled meetings with dates, details, and Join Meeting links.

Done when Each participant sees their own meetings and can open the relevant Zoom link.

F10

Implement Meeting Access Permissions

Build Authorize reading and managing meeting records according to each user's role and actual participation; enforce this on the back end.

Done when Unrelated users cannot access other people's meeting records through UIMS.

05 Sara Rajoub

Internship Opportunities & Student Features | 4 core pages | 7 Trello cards

COMPANY SUPERVISOR | OPPORTUNITIES

R01

Create Internship Opportunities

Build Build a company opportunity form with title, description, requirements, eligible college/major or specializations, and seat count; link the record to the supervisor's company.

Done when The company can publish an opportunity and eligible students can discover it.

R02

Edit & Close Internship Opportunities

Build Build a company opportunity list with editing and closing actions; update opportunity details and status in Firebase.

Done when A supervisor may modify their company's opportunities but cannot modify another company's records.

STUDENT | EXPLORE OPPORTUNITIES

R03

Display Opportunities Matching College & Major

Build Build Explore Opportunities and retrieve open opportunities appropriate to the logged-in student's college and major.

Done when Students see opportunities that match their academic details.

R04

Build Full Opportunity Details View

Build Show full opportunity information and an Apply button for logged-in students. Transfer the correct opportunity ID to Osama's Application Form.

Done when A student can inspect a matching opportunity and start the application for that exact listing.

STUDENT | DASHBOARD & PROFILE

R05

Build Student Dashboard

Build Create a student-specific dashboard summarizing applications, tasks, deadlines, evaluations, and progress using data supplied by the shared system.

Done when The dashboard displays current data belonging to the logged-in student.

R06

Display & Edit Student Profile

Build Show the student's academic data and provide editing for permitted personal information; protect Coordinator-controlled academic fields.

Done when Permitted student profile updates persist while academic fields remain protected.

R07

Add Student CV & Portfolio

Build Support a CV or portfolio link and, where chosen, file upload; save references and show them on the student profile.

Done when Students can add and revisit their CV/portfolio content.

06 Suja

Academic Supervisor Monitoring & Evaluation | 4 core pages | 7 Trello cards

ACADEMIC SUPERVISOR | DASHBOARD & MONITORING

S01

Build Academic Supervisor Dashboard

Build Display the logged-in academic supervisor's assigned students, internship statuses, and progress summary.

Done when Supervisors see only students assigned by the Coordinator.

S02

Build Student Progress Monitor

Build Show an assigned student's company, company supervisor, tasks, submissions, evaluations, training hours, delays, and feedback.

Done when The academic supervisor can review detailed progress for each assigned student.

S03

Add Academic Comments & Feedback

Build Enable an academic supervisor to write, save, and review academic comments about an assigned student's training.

Done when Comments persist in Firebase and are protected by supervisor assignment permissions.

S04

Implement Training Hours Tracking & Approval Rules

Build Track required, reported, approved, and unapproved hours as appropriate to the university's defined process. Ensure completed tasks do not automatically approve hours.

Done when Hours accurately follow the documented approval procedure and are available to authorized monitoring pages.

ACADEMIC SUPERVISOR | FINAL EVALUATION

S05

Build Final Academic Evaluation Form

Build Build the academic final evaluation form with university-specific criteria, grading scales, and comments for assigned students.

Done when The academic supervisor can save a valid final evaluation for an assigned student.

S06

Submit Academic Final Evaluation to Coordinator

Build Send the academic final evaluation through the system to the Coordinator, keeping its link to the correct student and training placement.

Done when The Coordinator can retrieve the submitted academic evaluation in Final Completion Review.

ACADEMIC SUPERVISOR | ACCOUNT

S07

Build Academic Supervisor Account Page

Build Display account information and allow updates to fields the academic supervisor is permitted to change.

Done when Permitted profile updates persist without unauthorized account changes.

07 Sara Dolat

Contact & Coordinator Profile | 3 core pages | 4 Trello cards

PUBLIC | CONTACT FORM

D01

Build Contact Form & Save Messages

Build Build Contact Us with Name, Email, Subject, and Message fields; validate and store submitted messages in Firebase and show submission feedback.

Done when A valid message is saved and is visible in the Coordinator's message inbox.

COORDINATOR | CONTACT MESSAGES

D02

Build Contact Messages Inbox

Build Build the Coordinator's Contact Messages view, displaying sender, email, subject, message, and submission date from Firebase.

Done when The Coordinator can find, open, and read incoming contact messages.

D03

Implement Contact Message Management

Build Add a simple message-management action, such as marking a message as reviewed, and save the resulting state in Firebase. This reviewed state is a proposed implementation detail.

Done when The Coordinator can distinguish reviewed messages from messages not yet reviewed.

COORDINATOR | PROFILE

D04

Build Coordinator Account Page

Build Show the Coordinator's account data, permit edits to appropriate fields, and save changes in Firebase with authentication checks.

Done when The Coordinator can securely view and edit permitted profile fields.

08 Project-wide Responsibilities

These six cards supplement the page assignments. Their named owners coordinate delivery; every developer still contributes their page designs, code, and testing.

X01 Document University Internship Requirements | Owner: Suja

X01

Document University Internship Requirements

Build Research and document the selected university, college, specializations, required hours, training-hour approval process, completion conditions, assessment criteria, and grade weights. Explicitly label any assumed method as hypothetical if official information is unavailable.

Done when The team has an agreed reference defining the university-specific rules used in the application.

X02 Set Up Shared Firebase Data Structure | Owner: Ahmed

X02

Set Up Shared Firebase Data Structure

Build Define common schemas, identifiers, role mappings, and relationships for users, students, companies, supervisors, groups, opportunities, applications, placements, tasks, submissions, evaluations, hours, and completion reports. Document access-control assumptions.

Done when All developers have a single shared data-model specification and use consistent field names.

X03 Set Up GitHub Repository & Project Structure | Owner: Osama

X03

Set Up GitHub Repository & Project Structure

Build Create the repository and shared ASP.NET Web Forms solution, organize project folders, and establish branching, merging, and basic integration rules.

Done when All team members can clone, run, branch, and contribute to the same solution.

X04 Assemble Final Figma Prototype | Owner: Nada

X04

Assemble Final Figma Prototype

Build Collect the team's designs; ensure consistent university branding, navigation, and reusable elements; assemble wireframes, mockups, and an interactive prototype covering major pages of all four roles.

Done when The complete Figma deliverable can be navigated and covers the required roles and main pages.

X05 Write Project README | Owner: Sara Rajoub

X05

Write Project README

Build Write a README describing project objectives, technology stack, requirements, local setup, ASP.NET execution, Firebase configuration, database structure, and demo account setup without publishing secrets.

Done when Another teammate can follow the README and run the project successfully.

X06 Perform End-to-End Testing & Prepare Live Demo | Owner: Osama

X06

Perform End-to-End Testing & Prepare Live Demo

Build Coordinate cross-role testing from account creation and opportunity listing through applications, confirmation, tasks, evaluations, approved hours, final approval, and report generation. Prepare the demonstration sequence and test records.

Done when The whole required internship workflow runs as a live demo and defects are sent back to their page owners.

09 Implementation Dependencies

Prioritize the cross-role connections needed for the required demonstration.

FIRST	DELIVERABLE / DATA	UNBLOCKS
A02 + X02	Shared authentication and Firebase model	All page owners
R01	A company publishes an opportunity	O01 application submission
O03	Student confirms one accepted placement	N06 trainee listing; F01 trainee task assignment
F04 - F07	Task submission, revisions, and grading	S02 monitoring and A15 student progress
N09 + S06 + S04	Company evaluation, academic evaluation, approved hours	A10 - A12 final review and approval
A13	Approved official report generated	A16 student PDF access

10 Essential Delivery Rules

One page, one developer. The owner designs, implements, integrates, and tests all behavior on their assigned pages; cross-page data access does not imply shared page ownership.

University rules come first. Research actual required hours, training-hour approval, completion criteria, grading method, and weights. Document hypothetical rules where official information is unavailable.

Confidential evaluations stay protected. Students can view permitted task feedback, grades, progress, and final results, but not confidential supervisor final evaluation forms.

Hours require an approval workflow. Finishing a task does not automatically approve training hours.

Final approval stays with the Coordinator. Completion and official PDF release happen only after Coordinator review and approval.

Optional work cannot block the core. Zoom F08-F10 is optional. A stored Zoom URL is not the same as creating a meeting through the Zoom API.

Required deliverables: Figma wireframes/mockups/prototype; working ASP.NET Web Forms + Firebase application; GitHub repository and README; Trello board; live demo showing the complete placement-to-completion workflow.

Submission deadline
Saturday, 24 October 2026 at 11:59 PM

Basis: UIMS Project Requirements Document (11 pages), plus the team's agreed page assignment and task breakdown. Team planning decisions and proposed implementation details are distinguished from mandatory requirements where relevant.
